

CTO needed for an exciting sustainability startup

Cauli is an early-stage sustainable startup that is building a tech-enabled circular food economy through reusable packaging. Our aim is to realise a world that fits our motto: Takeaway without the throwaway.

You will be joining the founding team as Chief Technology Officer, and build the company from MVP stage to an environmentally and commercially successful business at scale. The company has gained strong traction over the past 12 months. Please contact us today if you have hands-on development experience and are ready to make a difference to the environment!

Expectations

- As CTO, you will take full ownership of all technical aspects of the business, including but not limited to management of the mobile application, the service delivery system, and growing and leading the tech team.
- You can spend at least 25 % of your time on Cauli during the first phase and commit to full time after that.

Ideal profile

Hands-on development experience with front-end (Android/iOS), back-end (database/Laravel/MySQL), web, and the full lifecycle including deployment, monitoring, and operational refinement.

You have an entrepreneurial and sustainable mindset, and are ready to make a difference to our environment with tech and data.

The role is initially equity based until we complete funding (this is anticipated within 3-6 months). Post investment: salary, equity and other benefits. Ideally based in London.

How to apply

To apply, please send your CV to ming@wearecauli.com and a short paragraph on whatever you would like to tell us and we will be in touch! We've built an app. Come and take the wheel!
